Type Casting Float to Int and Int to Float

Float to Int:

Code:

```
#include <stdio.h>
int main() {
   float my_float = 12.35;
   int auto_int = my_float;
   int manual_int = (int)my_float;
printf("Type Casting Float To Int\n");
   printf("Automatic: %d\n", auto_int);
   printf("Manual: %d\n", manual_int);
   return 0;
}
```

Output:

Int to Float:

Code:

```
#include <stdio.h>
int main() {
   int my_int = 7;
   float auto_float = my_int;
   float manual_float = (float)my_int;
   printf("Type Casting Int To Float\n");
   printf("Automatic: %f\n", auto_float);
   printf("Manual:    %f\n", manual_float);
   return 0;
}
```

Output:
